

JOB OPPORTUNITY

Mid – Sr. Mobile Developer

Company	7Solutions CO., Ltd.	Employment	Outsource / Full-time
Location	[Office] Thonglor, Bangkok, TH	Reports to	Tech Lead

Responsibilities

- Design, develop, test, and maintain scalable mobile applications using Flutter and Dart.
- Own features throughout the full software development lifecycle, from technical design and implementation through release and post-launch support.
- Work closely with Product, UX/UI, Backend, QA, and external partners to translate business requirements into reliable mobile solutions.
- Contribute to application architecture, reusable components, state management, API integration, and overall codebase quality.
- Integrate RESTful APIs and third-party services while ensuring security, reliability, and maintainability.
- Perform code reviews, troubleshoot production issues, debug defects, and optimize application performance and user experience.
- Promote software engineering best practices including clean code, automated testing, version control, CI/CD, and release management.
- Support and mentor junior developers through technical guidance, code reviews, and knowledge sharing where appropriate.
- Proactively identify technical risks, improve development processes, and stay current with relevant mobile technologies and Flutter ecosystem updates.

Qualifications

- Bachelor’s degree in Computer Science, Computer Engineering, Information Technology, or a related field.
- 3+ years of hands-on mobile application development experience; strong candidates with equivalent experience are welcome.
- Strong proficiency in Flutter and Dart, with solid understanding of the mobile application development lifecycle.
- Experience integrating RESTful APIs and working with common mobile architecture patterns, state management, and asynchronous programming.
- Good understanding of mobile UI/UX principles, responsive layouts, performance optimization, and platform-specific considerations for iOS and Android.
- Experience with Git and collaborative development workflows; familiarity with CI/CD and automated testing is highly preferred.
- Working knowledge of JavaScript and TypeScript is an advantage.
- Good understanding of Agile/Scrum ways of working and cross-functional product development.
- Strong problem-solving skills, ownership mindset, and ability to work effectively in fast-paced or time-sensitive situations.
- Clear communication, good interpersonal skills, service-minded attitude, and ability to collaborate with both technical and non-technical stakeholders.

Preferred / Nice to Have

- Experience publishing and maintaining applications on the Apple App Store and Google Play Store.
- Experience with Firebase, analytics, push notifications, deep linking, or mobile security practices.
- Experience working on high-traffic consumer applications, e-commerce, fintech, marketplace, or other transaction-heavy products.
- Experience coaching junior engineers or contributing to technical standards and architecture discussions.

Core Tech & Ways of Working

Mobile	Flutter, Dart, iOS / Android
Integration	RESTful APIs, third-party services
Engineering	Git, Code Review, Testing, CI/CD
Methodology	Agile / Scrum, Cross-functional collaboration
